

R E M A R K S

Applicants thank the Examiners for the telephone interview granted May 12. During that interview it was agreed and accepted by the Examiners that this RCE and accompanying Amendment C would be filed in which the language from previously withdrawn claim 36 would be incorporated into claim 32 to make that claim allowable over the current art rejection of Gnuechtel in view of Keel. Also it was discussed and agreed that to more clearly define the term "sagging" that it would now be defined that sagging comprises a movement in a direction perpendicular to a plane of said web. It was also agreed that the specification would be similarly amended to clarify the term sagging. Therefore the substitute specification was amended at page 6, the paragraph beginning line 20 defining the sagging as comprising movement in a direction perpendicular to a plane of the web. It was agreed during the interview that not only independent claim 32 would be amended as indicated above but also that the method claim 57 would be amended in similar fashion.

As was pointed out during the interview, Gnuechtel has a sensor at 82 and 84 with a slot which only senses a lateral movement of the edge and could not sense a sagging of the edge in a direction perpendicular to a plane of the web. Also Gnuechtel only discloses rotating about a first axis and not a second axis and the secondary reference Keel only discloses a free rotation and not a driven rotation for that second axis.

Since independent claim 32 is allowable, it is respectfully requested that the withdrawn claims 33, 35, and 39-51 all be allowed since they are dependent upon allowable claim 32. Also since independent claim 57 is allowable, it is respectfully

requested that the withdrawn dependent claim 59 should be allowed since it is dependent upon allowable claim 57.

Allowance of the application is respectfully requested.

The Commissioner is hereby authorized to charge any additional fees which may be required, or to credit any overpayment to account No. 501519.

Respectfully submitted,

 (Reg. No. 27,841)
